EDUCATION

University of California, Los Angeles (UCLA)

Los Angeles, CA

B.S. Mathematics of Computation with a Minor in Data Science Engineering | GPA: 3.9/4.0

Graduation: Spring 2026

- **Courses:** Database Management, Data Science, Networks, Algorithms, Object Oriented Programming, Linear Algebra, Statistics
- **Activities:** Society of Women Engineers (Lobbying), The Bruin Group Consulting, DataTeach, Singapore Students' Association

WORK EXPERIENCE

Meta

Menlo Park, CA

Data Science Intern (Product Analytics), Biz Messaging Discovery

Jun – Sep 2025

- Led cross-market analysis of Click-to-Messaging ads on Facebook Reels, identifying a 20% lower conversion ratio on Reels vs. Feed and uncovering that a specific ad creation flow produced 80% lower-quality videos, directly impacting ad performance.
- Analyzed creative/UI drivers (video length, aspect ratio, CTAs) and correlated engagement metrics with monetization outcomes, shaping market-specific playbooks to address key performance gaps.
- Developed and secured alignment on 3+ product initiatives (e.g., mid-scene icebreakers, creative tooling in Ads Manager) projected to improve funnel conversion rates by 5–10% and increase user re-engagement.
- Partnered with Engineering and UXR to scope and propose conversion improvement strategies, including targeted research on Reels vs. Feed engagement and sizing headroom for global ad response rate growth.

Exponent

San Francisco, CA

Product Management Fellow

Apr – Jun 2025

- Led product roadmap for the Data Science track, improving clarity across 100+ lessons and drove a 15% increase in course ratings.
- Conducted competitive and sentiment analysis of top DS prep platforms and forums using web scraping and NLP (Google Trends API, TextBlob), uncovering positioning gaps and user pain points that guided targeted content and product enhancements.
- Synthesized user feedback to resolve top pain points, resulting in a 30% reduction in confusion reports and 23% drop in refunds.

Uber

San Francisco, CA

Product Manager (Contract), Uber Eats

Jan – May 2025

- Identified low engagement with Uber Eats' digital dining experience among 15,000+ UCLA students through competitive analysis, 150+ survey responses and 20+ user interviews, leading to a scoped redesign initiative.
- Performed statistical analysis to evaluate the impact on adoption likelihood, uncovering 3 key levers to improve engagement.
- Synthesized 5 key personas and revamped user flows in Figma, shortening task completion time by ~25% in prototype testing.

Jazz Hands For Autism

Los Angeles, CA

Data Science Intern

Sep 2024 – Jan 2025

- Built machine learning models enabling predictive analytics on student behavior, helping educators proactively address high-risk cases.
- Developed a ETL pipeline and live dashboard, boosting trend visibility and improving outcomes by 15% for 30+ adults with autism.
- Translated complex datasets into auto-updating reports in Google AppSheet, supporting educators in tailoring support strategies.

Handshakes

Singapore

Product Management Intern

Jun – Sep 2024

- Spearheaded roadmap for a B2B API product that drove \$30K+ in revenue, leading cross-functional teams around long term OKRs.
- Led development of an AI risk detection feature by using NLP to analyze news coverage of 60K+ companies and flag adverse media signals, enabling clients to mitigate exposure to default risk and enhancing product stickiness for compliance teams.
- Boosted product reliability by 40% through UAT, authoring test scripts and using Postman to validate functionality pre-launch.
- Conducted behavioral and market analysis, revealing friction points that informed feature updates and increased engagement by 15%.

ACTIVITIES

Break Through Tech | Artificial Intelligence Fellow

May 2025 – Present

- Selected from over 3600+ applicants to participate in the 12-month long Break Through Tech AI Program at Cornell Tech.
- Program included ML coursework with Cornell faculty, experiential learning experiences, and mentorship by industry professionals.

Perceptual Processing & Computational Lab @ UCLA | Research Assistant

Jan 2025 – Present

- Led usability testing for a frustration-inducing chat app prototype, analyzing feedback to guide interface improvements.
- Conducted dyadic analysis using Python and R to examine how research assistant personality traits influenced participant-reported frustration and task difficulty, uncovering key interpersonal effects on UX outcomes.

Association of Computing Machinery – Hack | Director

Nov 2023 – Present

- Led a 10-member cross-functional team to maintain and enhance ACM Hack's official websites utilizing the Gatsby React framework.
- Directed a quarter-long workshop on Web Development, teaching students how to build and deploy functional full-stack websites.

SKILLS

Technical: C++, Python, SQL, R, HTML/CSS, TypeScript, JavaScript, Selenium, Pandas, NumPy, PyTorch, Scikit-learn, React, Git

Product: JIRA, Confluence, PRD, UAT, A/B Testing, KPI/OKR, User Personas, Journey Maps, Usability Testing, User Interviews

Others: Microsoft Suite, Market Research, Competitive Analysis, Exploratory Data Analysis, Figma, Framer
